EXPORT AND IMPORT MERCHANDISE TRADE

The Bureau of the Census, Department of Commerce, announced today a seasonally adjusted September 1968 export total of $3,245.9 million, excluding Department of Defense (DOD) Military Assistance Program Grant-Aid shipments, and a seasonally adjusted general import total for September of $2,963.7 million.[1] [2] Comparable figures for August were $2,915.8 million for exports and $2,827.3 million for imports. Both the export and import seasonally adjusted totals for September were at all time record high levels. For exports, September is the second month in a row that record levels for U.S. exports were recorded and is the first time in history that exports have equaled or exceeded $3.0 billion. September was the second month in a row and the sixth time during 1968 that record seasonally adjusted totals were recorded for general imports. The Bureau pointed out, however, that the September figures may reflect accelerated export and import activity during that month in anticipation of the strike at east and gulf coast ports which was scheduled to begin on October 1. The Bureau does not have information as to the extent of the effect of the expected strike on the September figures.

For the first 3 quarters of 1968, exports on a seasonally adjusted basis were at an annual rate of $33,793 million while imports were at an annual rate of $32,680 million. This would represent an increase in exports of about 9 percent over the calendar year 1967 total of $30,934 million and an increase in imports of about 22 percent over the calendar year 1967 total of $26,812 million. For the 4-month period, June-September 1968, seasonally adjusted exports averaged $2,931.0 million per month, a level about 8 percent higher than the $2,709.0 million average reported for the preceding 4-month period, February-May 1968. Imports averaged $2,823.7 million for the current 4-month period, a level about 6 percent more than the $2,651.7 million average reported for the preceding 4-month period.

Seasonally adjusted export and import totals for selected Schedule A and B commodity sections and divisions are shown in tables 4 and 5. (Unlike the overall total, the commodity components for exports exclude foreign merchandise and include Department of Defense (DOD) Military Assistance Program Grant-Aid shipments.

September exports unadjusted and excluding Military Assistance Program Grant-Aid shipments increased from $2,786.8 million in August to $2,941.5 million in September. The record September total of $2,984.7 million for exports including Military Assistance Program Grant-Aid shipments was only slightly more than the previous high of $2,983.4 million reported in June of this year. The comparable total for August was $2,840.5 million. Unadjusted general imports rose from $2,739.1 million in August to a new all time high of $2,869.3 million in September. The previous high for unadjusted general imports was $2,814.6 million reported in May 1968.

[1] *Adjusted for seasonal and working-day variation, but not for price level.*

[2] *Cumulations of data over at least 3- or 4-month periods are desirable to identify underlying trends. Month-to-month changes in exports, imports, and similar series often reflect primarily irregular movements. Recent month-to-month percent changes in the overall seasonally adjusted export and import series are presented in the following table with average percent month-to-month rise and decline over longer periods shown for comparison. (Excludes percentage changes for the period December 1962-March 1963 and December 1964-May 1965 because of abnormalities in the data due to effects of strikes.)*

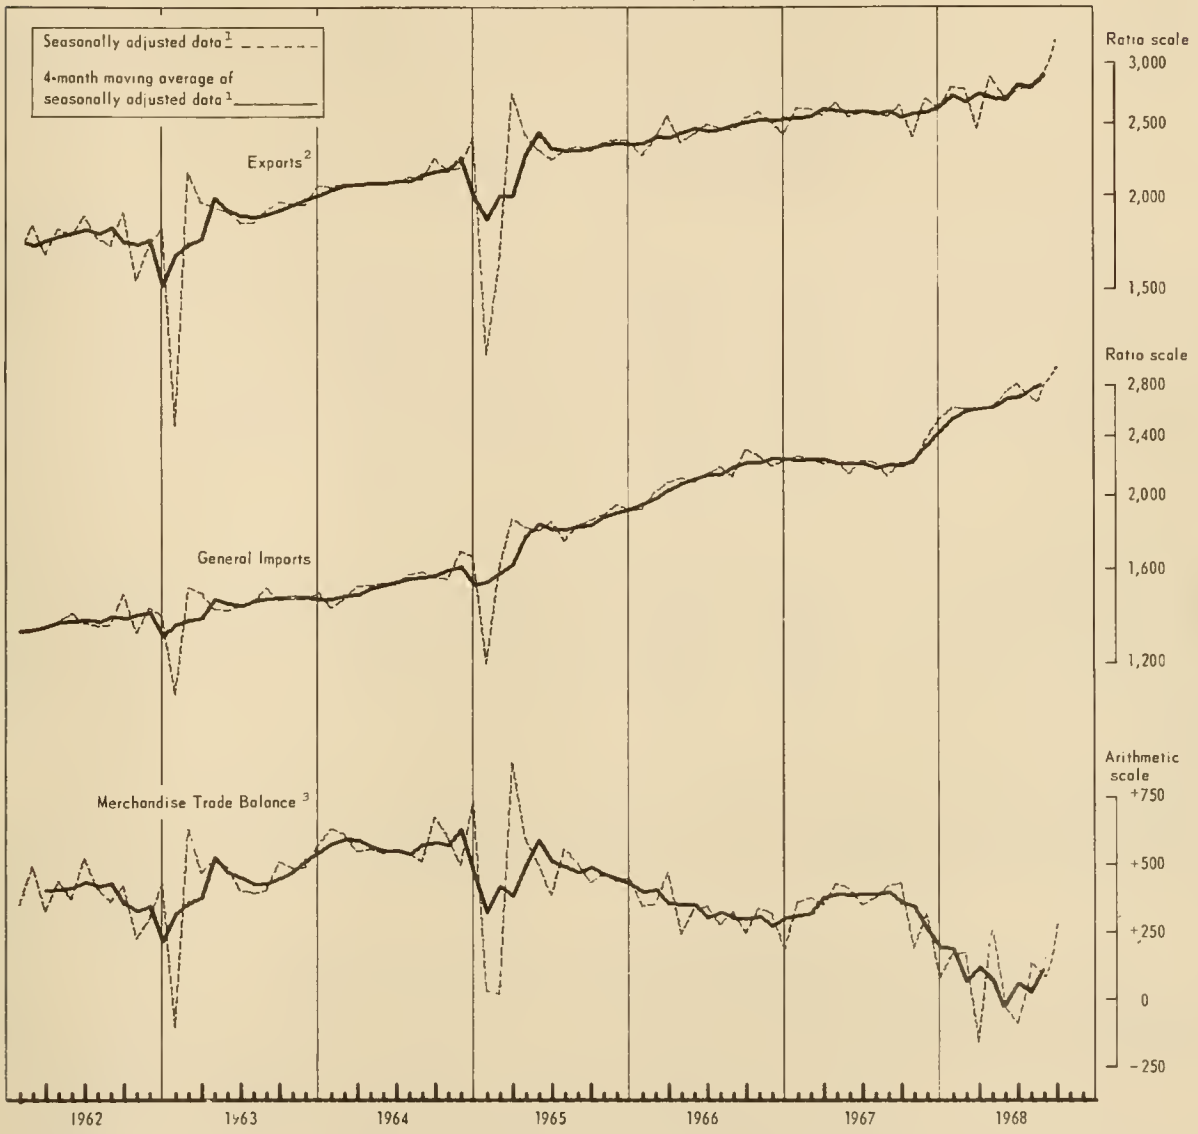
EXPLANATION OF STATISTICS

The dollar value shown in the import statistics is defined generally as the market value in the foreign country excluding U.S. import duties, freight charges from the foreign country to the United States, and insurance. General imports are commodities imported for immediate consumption plus entries into bonded warehouses. Imports for consumption are commodities imported for immediate consumption plus withdrawals for consumption from bonded warehouses. The dollar value shown in the export statistics is defined generally as the f.a.s. value, U.S. port of exportation. None of the values have been adjusted for changes in price level. Additional information regarding coverage, valuation, etc., is available in Report FT 990, Highlights of U.S. Export and Import Trade; in the brochure, Guide to Foreign Trade Statistics: 1968; or upon request to the Bureau of the Census, Washington, D.C. 20233. Information regarding the methodology used in seasonally adjusting the data is available on request to the Bureau of the Census, Washington, D.C. 20233.

U.S. Exports, General Imports, and Merchandise Trade Balance, Adjusted For Seasonal and Working-Day Variation: January 1962 to September 1968

(In millions of dollars)



[1]Abnormal fluctuations in the data for December 1962-March 1963, December 1964-May 1965, and March 1968 are due to effects of dock strikes. [2]Represents exports of domestic and foreign merchandise excluding Department of Defense (DOD) Military Assistance Program Grant-Aid shipments. [3]Defined as exports (see footnote 2, above) minus general imports.

[1]Data shown reflect adjustments for seasonal and working-day variation and do not necessarily add to annual unadjusted totals. The 1967 seasonally adjusted figures reflect revisions made in the seasonal adjustment factors effective December 1967.

[2]Data differs from those released in Department of Defense reports because of a difference in statistical definitions. For a further explanation, see footnote 1, table E-1, Report FT 990, Highlights of U.S. Export and Import Trade.

[2]Seasonally adjusted figures for section 7 may differ slightly from the sum of divisions 71, 72, and 73 since each is independently adjusted.

[3]Data shown reflect adjustments for seasonal and working-day variation and do not necessarily add to annual unadjusted totals. The adjusted section totals in this table and the adjusted overall monthly totals in tables 1 and 2 were developed independently. The figures in this table include DOD Grant-Aid shipments which are excluded from the adjusted overall monthly totals in tables 1 and 2.

[4]For technical reasons data are not presented for this section.

Table S. U.S. General Imports of Merchandise--Schedule A Sections, Seasonally Adjusted and Unadjusted, by Month: January 1967 to September 1968

(In millions of dollars. Figures for 1967 reflect revisions made in the data subsequent to the publication of the December 1967 reports. Figures for 1968 are as originally compiled, except as noted in footnotes 4 and 5 below. Unadjusted totals represent sum of unrounded figures hence may vary slightly from sum of rounded amounts)
